

The Benefits of Enrolling in Citrix Training with Arrow

Why should you train with Arrow? Here are three reasons why Arrow provides an easy way to get the best training, with the easiest path to certification, and the most updated course information that you need to run a successful company and a productive partnership.

Updated Courses

Our courses are updated regularly to reflect the changing needs of IT professionals and organizations. With each new release, our instructors are updated and ready to teach the new and evolving courseware.

Instructor-Led Training

All of our classes, whether in-person or online, are directed by a Citrix-Certified Instructor, trained in educating IT professionals, and an expert in using each of the Citrix products that they teach.

Guaranteed-to-Run Courses

Arrow offers the most amount of Guaranteed-To-Run courses—courses that are guaranteed to happen no matter how many people have enrolled in the class—which means you can make travel plans, knowing that the course will happen no matter what.

Forget the Exam!

Currently, Citrix is offering a Recertification Program, which excludes the need to take and pass the Citrix exam if you enroll and sit for training. Available for all current certifications, this program offers the opportunity to simplify the process, maintaining your certification without the need for a lengthy and difficult exam.

According to Citrix Education, 93% of Citrix Education students became more effective in their role after attending a training course, with 47% of calls to support from uncertified and not trained individuals. Don't wait to give you team the best education. Validate your ability to implement Citrix solutions and maintain your partner status today.
